SUMMARY

Entry-level IT support candidate with hands-on networking and Windows/Linux lab experience. CompTIA A+ scheduled May 2026, with active CCNA preparation underway. Customer-facing background from shift supervisory work translates directly to help desk environments using ServiceNow and Jira. Comfortable in Windows, Linux, and virtualization, with documented home lab work in pfSense, VMware, and Python automation.

TECHNICAL SKILLS

Operating Systems: Windows 10 and 11, Ubuntu, Debian, Rocky Linux

Networking: TCP/IP, DNS, DHCP, subnetting, VLANs, firewall rule design, OSI model, Wi-Fi standards

Virtualization: VMware Workstation Pro, network segmentation, snapshot and rollback workflows

Security: pfSense firewall configuration, WPA2 and WPA3, network segmentation, basic hardening

Tools and Platforms: Active Directory basics, Microsoft 365, ServiceNow, Jira, Git, Bash, Python

Hardware: PC building, troubleshooting, RAID configuration, storage layout

PROJECTS

Routed Two-Subnet pfSense Lab

Ongoing

- Built a virtualized network in VMware Workstation Pro with pfSense CE 2.7.x routing two subnets across dedicated VMnets, segmenting LAN and lab traffic.
- Configured top-down firewall rules permitting targeted SSH between hosts while blocking general inter-subnet traffic, with logging on every rule for audit trail.
- Verified the environment with SSH sessions, ICMP tests, and live firewall log captures from Ubuntu, Debian, and Rocky Linux hosts.
- Phase 2 of a documented five-phase build progressing into Cisco labs for CCNA preparation.

Python Scheduled Automation Project

2025 to present

- Built a two-file Python application running scheduled API jobs with structured logging, retry logic, and observable error handling.
- Applied operations patterns including authentication management, graceful failure handling, and idempotent retries.
- Polymarket public API used as the data source.

Bash Learning Tool

2026

- Built a self-quizzing tool to drill Linux shell fundamentals against personal lab context, covering twelve topic areas with eight to twelve exercises each.

EXPERIENCE

Shift Supervisor, SubDaze, Zionsville, IN

July 2025 to October 2025

- Supervised a small team during peak service hours, balancing customer service with operational throughput.
- Resolved customer issues directly without escalation in most cases, building communication skills directly applicable to help desk work.
- Managed cash handling, inventory verification, and end-of-shift documentation.

Deli and Prepared Foods Associate, Whole Foods Market, Indianapolis, IN

March 2026 to April 2026

- Front-of-house customer service in a high-volume retail environment.
- Maintained food safety and quality standards under time pressure.

EDUCATION AND CERTIFICATIONS

CompTIA A+ (220-1201 and 220-1202), Scheduled May 2026

CCNA (200-301), In preparation, target completion late 2026

Carmel High School, Graduated 2024
