SUMMARY

Hands-on IT technician, CompTIA A+ certified, Security+ in progress. I taught myself by building and running a full home lab the way a real shop would: plan each change, document it, test it. Customer-facing work taught me to stay calm and solve problems for people under pressure, which is the core of good help desk support.

TECHNICAL SKILLS

Systems: Windows 10 and 11, Windows Server 2022, Active Directory, Group Policy, Linux (Ubuntu, Debian, Rocky)

Networking: TCP/IP, DNS, DHCP, VLANs, subnetting, pfSense firewalls

Virtualization: VMware Workstation Pro, Docker

Tools: Git, Bash

Familiar, not yet hands-on: Microsoft 365, ServiceNow, Jira

Hardware: PC building, troubleshooting, storage configuration

PROJECTS

Active Directory Domain Lab

In progress, documented

- Run a live Windows Server 2022 domain with users, security groups, Group Policy, file shares, and redirected home folders, the same setup a small business would use.
- Joined a Windows 11 client to the domain and verified logins, policies, and folder redirection all apply correctly.
- Every phase is written up as a public step-by-step guide on my lab guide sites, linked from my portfolio.

pfSense Firewall Lab

Complete, documented

- Built a two-subnet virtual network routed through a pfSense firewall in VMware.
- Wrote deny-by-default rules that allow only specific SSH traffic, then proved they work with live tests and firewall log captures.

Linux Server Lab

Ongoing

- Hand-configured Ubuntu, Debian, and Rocky Linux servers, each using a different network configuration method.
- They serve as the test machines behind the firewall lab, with snapshots taken before every change.

EXPERIENCE

Deli and Prepared Foods Associate, Whole Foods Market, Indianapolis, IN

March 2026 to April 2026

- Customer service in a high-volume retail environment with strict food safety standards.

Shift Supervisor, SubDaze, Zionsville, IN

July 2025 to October 2025

- Supervised a small team during peak hours and resolved most customer issues without escalation.
- Handled cash, inventory checks, and end-of-shift documentation.

EDUCATION AND CERTIFICATIONS

- CompTIA A+ (220-1201 and 220-1202): Certified June 2026
- CompTIA Security+ (SY0-701): In preparation, exam targeted for late August 2026
- CCNA (200-301): Planned
- Carmel High School, Graduated 2024
